Laser Wheel Alignment Gauge

Do you want:

- accurate wheel alignment
- faster and efficient work flow
- smarter return on your investment?

Then choose Trak-Rite XY, the professionals choice. Robust and precision engineered in the UK.

Front wheel scales are easily legible from low and high angles. Clear laser lines ensure fast and accurate readings.

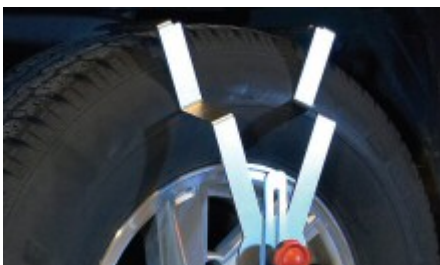

The Trak-Rite XY fits all wheel sizes from 10" to 20". The Trak-Rite XY Max accommodates larger sizes.

Low working height makes easy work of low spoilers, lowered suspension and wheel arches.

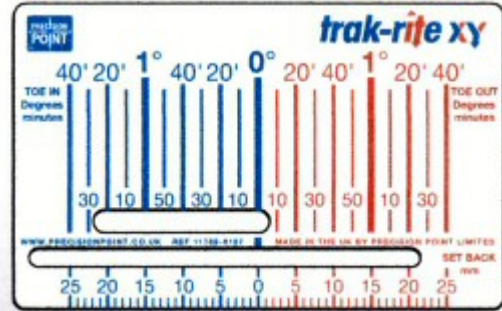

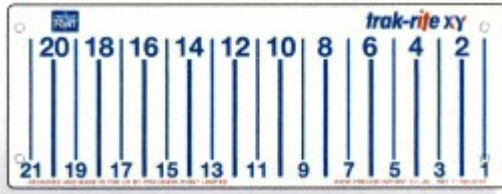

Sprung aluminium contact pins, gentle on alloy wheels and simple to adjust. Easy levelling with precision bubbles.

Gravity force attaches each gauge to the wheel, allowing fast workflow without loss of accuracy.

Wireless operation. Two charger/rechargeable AA battery sets for minimum down time.

Rear & Front Laser tracking scales

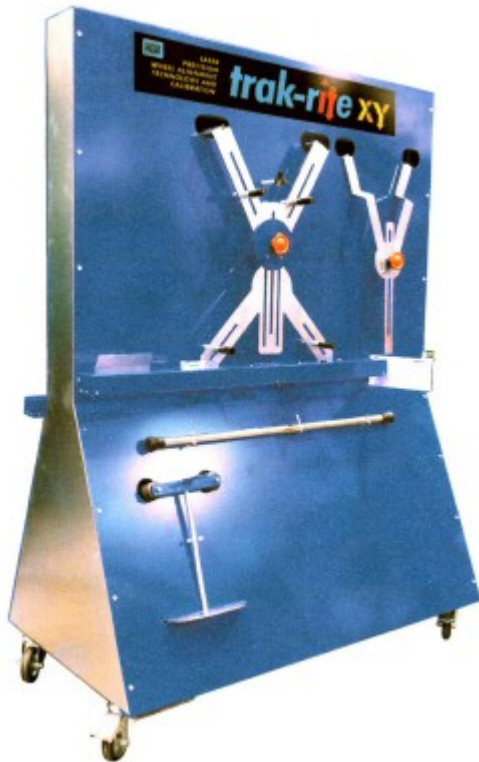

Digital Caster/Camber meter (optional)

The Trak-Rite XY System

The Trak-Rite XY is a complete wheel calibration system supplied with full instructions and its own steel workshop stand to ensure that the components and accessories are readily to hand.

Two versions of the Trak-Rite XY stand are available:

Double-sided, free-standing, epoxy coated steel on four removable castors.
Two single-sided stands, epoxy coated steel, for wall mounting.

Options and spare parts

Optional equipment includes a digital caster/camber gauge and a number of wheel turntable designs.

Brake Pedal Applicator & Steering Stop
